EDUCATION

- Bachelor of Technology in Computer Science Engineering |pursuing 3rd year|Gandhi Institute of Technology And Management, Bengaluru
  CGPA: 9.5 (2022-2026)
- Intermediate | JCNRM Junior College, Tadipatri 97.5% | 2022

WORK EXPERIENCE

Software Engineering Projects (2023 - Present)

- Worked as a project intern in intel Unnati internship for project Image Sharpening using Knowledge distillation.
- Created a Java-based task management desktop application.
- Completed project internship in Infosys springboard as a java developer.

ACADEMIC PROJECTS

- **AI Model – Image Sharpening model for video conferencing**
  A Python-based deep learning solution to enhance image clarity in real-time video conferencing. Developed an ultra-lightweight CNN by distilling knowledge from the Real-ESRGAN model, enabling efficient sharpening on low-bandwidth connections. Achieved [>30 FPS] performance and [>90%] SSIM. Technologies: Python, PyTorch/TensorFlow, OpenCV

- **L&D Management System – Full-Stack Learning Management Web Application**
  A web-based application built to streamline employee training management for organizations. Designed with role-based access for account managers, LCD admins, and employees to request, assign, and track training programs. Implemented course progress tracking, feedback collection, and course approval workflows. Technologies used: React.js (frontend), Spring Boot (backend), and RDBMS. Demonstrated full-stack development, REST API integration

- **TaskManager - Java-based Task Management Application**
  A Java-based desktop application designed for task management and productivity. Analyzed user requirements and developed to create, update, and track tasks, set deadlines, and categorize their activities. The app offers reminders and analytics for completed tasks. Technologies used: Java. Highlighted software design and testing methodologies.

POSITION OF RESPONSIBILITY

- **Team Lead, Academic Projects**
  Led a small team to complete projects, managed task delegation, and ensured deadlines were consistently met. Fostered collaboration and technical problem-solving to deliver high-quality results.
- **Coordinator, Group Assignments**
  Coordinated group work by assigning roles and keeping track of progress.

SKILLS

- **Technical skills in programming**: C, Java, Python and data structures (Basic)
- **Web Development**: HTML, CSS, JavaScript
- **Databases:** SQL, MongoDB (In Progress)
- **Other Technologies**: Ongoing pursuit of Machine Learning

- **Soft Skills**: Collaborative, Engagement, Prioritizing, Communication, Adaptability

CERTIFICATIONS

- **Android Development**: Certificate from AICTE.
- **Certificate of Career essentials** in generative AI by Microsoft and LinkedIn
- **Coursera Certificates**: Excel, Organizational Behavior, Professional Email Writing, Creative Presentations
- **Infosys springboard**: Java foundational certification including unit testing with JUnit

ACHIEVEMENTS

- **Effective Communication:** Received multiple appreciations for delivering engaging presentations and seminars, highlighting strong communication skills.
- **Academic Excellence:** Consistently achieved top grades, earning multiple medals and awards for outstanding performance**.**
